Introduction

IYCY Achievements summary on the project 11908

Funded by YHF :

IYCY Integrated emergency life-saving interventions with Nutrition, Health, WASH under the parameter 1 for most vulnerable affected populations group with high risk of famine and with high SAM prevalence in Maqbanah, and Mawza districts in Taizz.

Because of the war and the conflict since 2015 that effect the health system where it has been destructed especially in western coastal district which Mawza District one of those effected districts. Where IYCY current intervention in project 11908 IYCY has achieved the coordination activities by operating and supporting 2 existing Health Facilities in Mawza'a district.

IYCY

has trained HWs,CHV, CNV, and CWVs

IYCY establishment and trained Both HWs (14 Health and 4 Nutrition) & CHVs (20 Health and 20 Nutrition) to strengthened the capacity of this HF's system, and involving the communities to be a main partner in responding to improve access to essential lifesaving primary health services, including maternal, reproductive, neonatal, child health care and immunization services and also to roll out the lacking CMAM components and IYCF trainings for HWs & CHVs, provision of preventive services and providing all CMAM services for children 6-59 months with SAM at HF's and at community and household levels i.e nutrition screening, admission into TSFP & OTP, Vitamin A supplementation, Fe/Fo supplementation to PLWs, deworming, Zinc supplementation for diarrhea cases, hygiene promotion & other key primary health services and improved the Hygiene practices through, trained 40 Community WASH Volunteers (CWVs) /WPs in Mawza'a and Maqbanah district on hygiene messages conducting hygiene promotion / community mobilization and water quality surveillance activities with safe Sanitation by conducting cleaning campaigns to complement the nutrition and health awareness raising activities in the community
