about IYCY

International Youth Council-Yemen (IYCY) is a humanitarian, independent, non-profit, non-governmental organization founded in 2012 that works across Yemen. (IYCY) provides direct assistance for conflict-affected populations, IDPs, host communities and vulnerable groups in the conflict areas. (IYCY), in partnership with international and Local NGOs, and with government authorities takes action during crisis situations to engage in other contexts where its competencies will add value. (IYCY) promotes durable solutions for conflict-affected populations and helps to restore services, education, economic, wellbeing and health.

IYCY has a headquarter office in Sana'a Gov. and has an 2 sub-offices in Taizz and Aden Gov. and has more than 4 warehouses in Taizz governorate which can support IYCY operations. IYCY's staff are well equipped and experienced to lead and manage the rapid response as it has done so for many years.

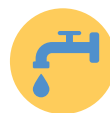

background

Since May 2015, till now IYCY has been working in Taizz governorate especially in most conflict affected districts implementing several projects in WASH, Health, Shelter and Food Security Sectors. .

IYCY built the capacity of its staff and community Volunteers and networks on implementing emergency programs in most hard to reach areas In close working and coordination with National and Sub-National Clusters across multiple sectors , Now IYCY has current responses in several sectors including but not limited:

Health and Nutrition

Water Sanitation and Hygiene Promotion (WASH)

Shelter/NFIs

Food Security , Livelihoods and Agriculture

Protection

IYCY has two currently ongoing integrated project of Health and WASH sectors that supported by UN-OCHA which response to the most vulnerable affected people of IDPs and local communities in 9 districts of Maqbanah, At Ta'iziyah, Jabal Habashy, Al Wazi'iyah, Mawza'a, Al Ma'afer, Sharab Ar Rawanh, Al Muka and Dhubab in Taizz governorate.

IYCY currently has two ongoing projects supported by UN-OCHA the first integrated WASH and Health project under the 1st Standard Allocation 2018 and the second ongoing Health project under the 1st Reserve Allocation - June 2018 and responding to the most vulnerable affected population of IDPs, returnees and local affected population in 9 districts of Maqbanah, At Ta'iziyah, Jabal Habashy, Al Wazi'iyah, Mawza'a, Al Ma'afer, Sharab Ar Rawanh, Al Muka and Dhubab in Taizz governorate as well as in close coordination with Shelter Cluster and by UNHCR supporting, IYCY is going to response to most vulnerable affected 665 IDPs families assessed by IYCY team with Emergency Shelter (Family Tents) with NFIs kits and winterization assistance.

The first integrated WASH and Health project under the 1st Standard Allocation 2018. Through this integrated proposed project of Health and WASH, IYCY is responding in line with YHF 1st Standard Allocation 2018, YHRP 2018 and health and Wash clusters strategic objectives and first-line response objectives to most prioritized, assessed, unmet needs or gaps in PHC and Wash services, to reduce morbidity and mortality of the most vulnerable affected girls, boys, women, men and elders of population groups (IDPs, Returnees and the local population) in front-line and hard to reach areas in the 7 target districts of Maqbanah, At-Ta'iziyah, Jabal Habashy, Al-Wazi'iyah, Mawza'a, Al-Ma'afer and Dhubab in Taizz governorate. This integrated project of Health and Wash will fill the identified gaps with aiming to improve and increase access of the most vulnerable affected population groups to essential quality preventative and curative health care and Wash services during the project period.

The second ongoing Health project under the 1st Reserve Allocation - June 2018. Under the leading of Health Cluster the project is responding and prioritizing to support Health Cluster preparedness plan 2018 to address the most critical lifesaving activities in health sector in 7 targeted locations of Maqbanah, Al Mukha, Al Wazi'iyah , Jabal Habashy, Shara'b Ar Rawnah, Mawza and At Tazyah districts in Taizz governorate. This project has responded to the current acute emergency conflict with focus on cholera outbreaks response through set up cholera emergency contingency stock of medicines and medical supplies. IYCY has completed conducted refresher training for 210 health staff worked in over than 64 Health Facilities (HFs) on surveillance, case management as well as IYCY completed distribution of medical supplies and support 70 health facilities with medical supplies and will further support the health cluster to perform its role to enhance health system capacity to adequately respond to outbreaks in 7 targeted districts. Moreover, **in close coordination with Shelter Cluster and by UNHCR supporting, IYCY is going to response to most vulnerable affected IDPs assessed by IYCY team with 300 IDPs families with Emergency Shelter and 300 IDPs families with NFIs kits in Mawza'a district and support 65 IDPs families in need of winterization assistance in Al-Ma'afer district.**

In addition, IYCY has a very good access to the most critical and hot spots areas in conflict affected districts in Taizz governorate as it also adopted neutrality as a core value to serve most vulnerable population groups (IDPs, Returnees and the local population) regardless of their political and cultural background and gender. IYCY has sub-office in Taizz governorate and has full capacity to intervene in any time for the most affected population group in most hard to reach areas in affected districts in Taizz governorate. IYCY access, experiences and trust was gained during its projects implemented in very critical times where no other organizations were able to reach vulnerable people or take the risks to provide lifesaving services to the most vulnerable affected people.

IYCY

achievements of december 2018

rapid response

strengthen the functionality and Supporting 70 Health Facilities (HFs) with essential medical supplies) to provide specialized care and treatment, Support the target health facilities with inpatient beds and supplementary supplies and drugs to support the treatment of AWD and cholera cases, Building the capacity of the health workers through training for 213 health workers on cholera treatment guidelines and effective case management. Support and capacity of the Community based surveillance 70 CHVs targeted priority areas on case definitions, reporting tools, outbreak detection and first responder rules and procedures Distribution of IEC material and ORS to the patient and referral of cases to DTCs and DTUs. Furthermore , IYCY has completed conducted training for 70 volunteers on conducting health and RH education and promotion outreach sessions on reproductive health topics for women and on communicable disease prevention and hygiene, nutrition related practices and health seeking behavior for mothers and their children under 5 at community level

key achievements

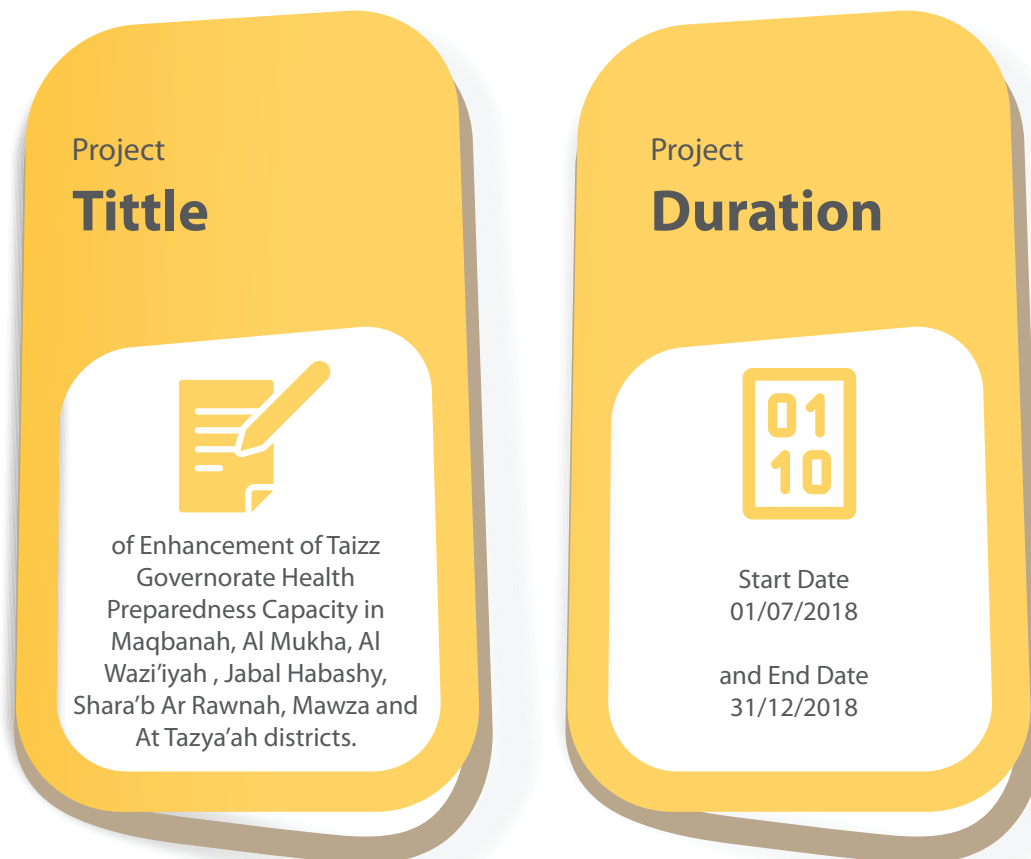

- IYCY has completed conducted refresher training for 213 health staff targeted more than 70 Health Facilities (HFs) on surveillance, case management and will further support the health cluster to perform its role to enhance health system capacity to adequately respond to outbreaks in 7 targeted districts in Taizz governorate ..
 - IYCY completed distribution of medical supplies in order to strength and support 70 health facilities in the 7 target districts with medical supplies .
 - IYCY has completed conducted training for 70 volunteers on conducting health and RH education and promotion outreach sessions on reproductive health topics for women and on communicable disease prevention and hygiene, nutrition related practices and health seeking behavior for mothers and their children under 5 at community level.
 - IYCY has completed Conducting training sessions for 70 CHVs for outreach activities in the 7 target districts. training sessions was on Water quality testing for free residual chlorine (FRC), monitoring, and timelines for reporting intervals and implementing the Hygiene promotion activities and for distribution of hygiene kits and jerry cans .
- A Total of 3481 individuals have been reached through Conduct health and RH education and promotion outreach sessions on reproductive health topics for women and on communicable disease prevention and hygiene, nutrition related practices and health seeking behavior for mothers and their children under 5 at community level.
- For more than 11, 000 people have been reached Hygiene promotion awareness seesions, , community mobilization, promotion of good sanitation practice and cholera awareness messages (at community level, household level, schools, markets, mosques etc) in AlMafer , Magbana, Mawza'a , Jabal Habashy, Alwazeaia and Dubab districts of Taizz governorate.

project summary

Under the leading of Health Cluster the project is responding and prioritizing to support Health Cluster preparedness plan 2018 to address the most critical lifesaving activities in targeted locations of Maqbanah, Al Mukha, Al Wazi'iyah , Jabal Habashy, Shara'b Ar Rawnah, Mawza and At Tazyah districts in Taizz governorate. IYCY responded to the current acute emergency conflict with focus on cholera outbreaks response through set up cholera emergency contingency stock of medicines and medical supplies as well as IYCY has completed conducted refresher training for the more than 210 health staff on surveillance, case management and will further support the health cluster to perform its role to enhance health system capacity to adequately respond to outbreaks. In addition IYCY completed distribution of medical supplies in order to strength and support 67 health facilities in the 7

project achievement in december 2018

training achievements

Moreover, IYCY has already supported by UN-OCHA under the 1st Reserve Allocation - June 2018 to provide only medical supplies to the health facilities that serve the most affected population by cholera outbreaks and train the health facilities staff in 7 districts of Maqbanah, At Tazyah, Sharab Ar Rawanah, Mwaza'a, Al Wazyah, Al Muka and Jabal Habashi in Taizz governorate. At the beginning of the project period IYCY has coordinated and conducted workshops and meetings with ground project staff, GHO, DHO and HFs workers in the 7 districts in order to the surveillance, case management, first aid, trauma care etc. for cholera outbreaks and Diphtheria case management in the 7 target districts in Taizz, However that IYCY after the coordination with the PHOs in the targeted districts get the Nomination notes from PHOs and starting to train the health worker as 30 trainees from each district. The training was on integrated management of on the SOPs and case management for cholera outbreaks and Diphtheria case management in the 7 target districts in Taizz, in order to the surveillance, case management, first aid, trauma care etc. for cholera outbreaks and Diphtheria case management. Figures below indicate the number of HFs & HW trained in the 7 targeted districts.

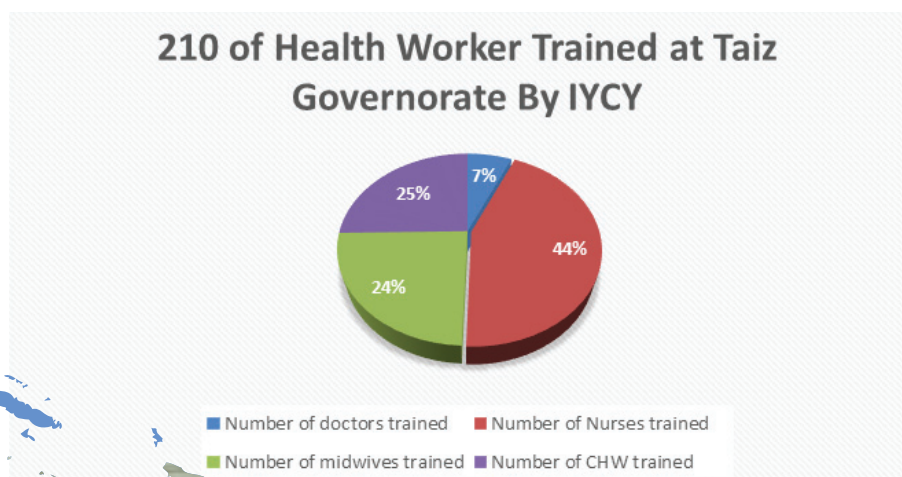

Figure 2: No of Health Worker Trained at Taiz Governorate by IYCY

distribution of medical supplies to the hfs

IYCY has completed distribution of medicine and medical supplies to 70 health facilities at Maqbanah, At Tazy'a'ah, Sharab Ar Rawanah, Mwaza'a, Al Wazy'a'ah, Al Muka and Jabal Habashi in Taizz governorate, IYCY has contributed towards the 1st Reserve Allocation - June 2018 and Health cluster Preparedness Plan 2018 as well as health cluster strategic objectives as it focuses on the highest priority lifesaving humanitarian response in the Health sector, by providing life-saving health services through Procurement and pre-positioning of stocks of medication and medical supplies and Improved service delivery through capacity building of 210 health care Worker with focus on the highest risk priority districts affected by Cholera outbreaks. Tables and figures below: indicate the number of health facilities that has supplied by medicine and medical supplies.

the second currently integrated health and wash project

project summary

Through this integrated proposed project of Health and WASH, IYCY will respond in line with YHF 1st Standard Allocation 2018, YHRP 2018 and health and Wash clusters strategic objectives and first-line response objectives to most prioritized, assessed, unmet needs or gaps in PHC and Wash services, to reduce morbidity and mortality of the most vulnerable affected girls, boys, women, men and elders of population groups (IDPs, and the host population) in front-line and hard to reach areas in the 7 target districts of Maqbanah, At-Ta'iziyah, Jabal Habashy, Al-Wazi'iyah, Mawza'a, Al-Ma'afer and Dhubab in Taizz governorate. This integrated project of Health and Wash will fill the identified gaps with aiming to improve and increase access of the most vulnerable affected population groups to essential quality preventative and curative health care and Wash services during the project period with the following two components.

From the side of health component

This project response to ensure provision of critical lifesaving and life sustaining health care to highly vulnerable people and those affected by disease outbreaks and conflicts in front-line and hard to reach areas in the 7 target districts in Taiz governorate.

- 1) Provide critical primary and secondary care under MSP which includes trauma care, communicable diseases, SAM ,and referrals to appropriate level of care
- 2) Provide MISP including EmONC services
- 3) Support surveillance and vaccinate children and women against vaccine preventable diseases /endemic diseases.
- 4) Support and equip the target HFs with essential medical supplies and equipment of BMP health services to the target HFs.
- 5) Strengthen the capacity of the target HFs system by conducting training for the HFs staff on providing PHC services.
- 6) Build the capacity for CHVs to enhance their knowledge and skills for complementing the services of the HFs by outreach activities to bridge the gaps between the communities located in conflict areas and the health facilities.
- 7) Improved delivery of EPI targeting under five and women of child-bearing age disaggregated by gender.

From the side of wash component:

This integrated project is aiming to improve and increase access of the most vulnerable affected population groups to essential minimum assistance package of Wash services through:

- 1) Ensure safe and sufficient water to meet basic drinking, domestic and personal hygiene needs.
- 2) Support adequate, safe and appropriate sanitation and waste management through conducting cleaning campaigns for IDPs in hosting sites and;
- 3) Provide critical hygiene items and promoting use for personal hygiene, health and dignity and understand WASH related borne diseases and practice good hygiene practices in hard to reach areas to the most vulnerable population in Taizz governorate.
- 4) Build the capacity of CWVs in the 7 districts for carry out the wash activities promotion sessions.

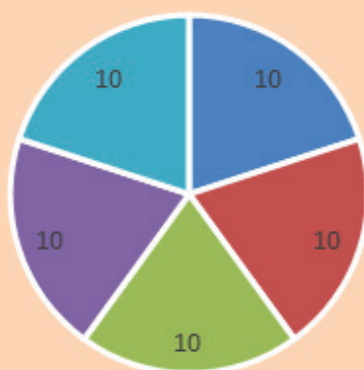

project achievement in december 2018

training achievement

IYCY has completed conducted training for 70 volunteers on conducting health and RH education and promotion outreach sessions on reproductive health topics for women and on communicable disease prevention and hygiene, nutrition related practices and health seeking behavior for mothers and their children under 5 at community level. In addition , IYCY has completed Conducting training sessions for 70 CHVs for outreach activities in the 7 target districts.

GAPS AND NEEDS

Nonetheless, there are still remain gaps in order to provide integrated response with health and Wash services which are most critical and highly needed with a view to treat and prevent the re-occurrence third wave of cholera outbreaks in the affected areas of districts in Taiz governorate. Re-functional and continuous support to the established DTCs and ORCs in target districts such as support the health facilities staff with incentives and rehabilitation the HFs and provide the HFs with safe drinking water are also very high needed.

In the other hands, there are critical needs for Wash services in districts where the cholera cases are increasing every day which required for immediate respond and covering Wash gaps at the level of communities and health facilities to prevent the affected people by the cholera disease such as conduct rapid cholera assessments and sanitary surveys , chlorination of water resources, distribution of chlorine tablets at household level and Cholera Wash kit, disinfection of household water storage tanks, Provision of emergency water supply in critical hotspot areas, water quality monitoring for FRC and Community mobilization for cholera awareness and improved hygiene practices.

As a result of increasing Cholera cases, IYCY has received appeal from the HFs in the 7 districts to continue supporting the HFs with medicals supplies in order to prevent the re-occurrence third wave of cholera outbreaks in districts.

For this reasons IYCY has recently responded to increase in the number of cholera cases in affected areas of Maqbanah, At Tazyah, Sharab Ar Rawanah, Mwaza'a, Al Wazyah, Al Muka and Jabal Habashi districts in Taizz governorate with integrated package of WASH and Health services. IYCY is doubled its efforts to response to affected population by Cholera outbreaks, however due to budget limits IYCY faced challenges to cover the gaps and provide the basic life-saving services of health and Wash to affected communities by the cholera outbreaks in the 7 districts.

What is most important, **IYCY since last month has been conducting Multi- Sectors Needs assessment in the mentioned target districts in Taizz governorate to monitor, examine and identified the priority needs for the highest vulnerable affected population group of IDPs, Returnees and local communities.**

The purpose of this Multi- Sectors Needs assessment is to establish the severity and range of humanitarian needs of vulnerable affected population group and develop recommendations for programmatic responses in the target districts. Furthermore, the assessment focused on evaluating the Water, Health, RH and Nutrition, Sanitation and Hygiene, Food Security, livelihoods and Agriculture, Shelter/NFIs needs in finding a way for immediate relief to the most vulnerable group in Taizz governorate.

IYCY has conducted Need Assessment for all the target health facilities in the 7 target districts and identified the gaps and need for the health facilities and identified the most vulnerable groups of IDPs, Returnees and local populations that surrounded the health facilities. The report will be shared with Health cluster and relevant clusters in the upcoming days.
